

# FULL CONTROL OF YOUR HOME IN THE PALM OF YOUR HAND!

**NOVATRONICA**  
INNOVATIVE TECHNOLOGY

**TC24**  
HOME PROTECTION

## Say goodbye to door controls!

TC24 is a GSM unit better known as **Terminal Communicator** that allows interaction between the user and the installed device.

This Communicator allows you, through SMS or voice call, to activate your alarm, open gates, trigger irrigation systems and have full control over the safety of your assets.

This Communicator is the **easist** and most **encomical** way to provide the **security** and the **convenience** you need today.

**GATES**

**IRRIGATION  
SYSTEMS**

**ETARS**

## FEATURES:

### ACTIVATE ALARM

Confirming your number's validity, the device performs the activation of its alarm. After your call, you will receive an SMS indicating the alarm status.

### ALARM ALERT

If your alarm detects any movement and triggers the alert siren, the device will send an SMS or make a voice call with this information.

### DEVICE ACTIVATION

You can remotely activate other devices. The system has exits that allows you to activate the opening of condominiums automatic gates, irrigation system, among others.

### AUTOMATION

The TC24 inputs enable positive and negative connections, which are ideal for industrial automation, generating information via SMS.

## CHARACTERISTICS:

Power	~10 36 VDC
GSM Module	Huawei/Telit/SlimCom/Sagem
Digital Inputs	4
Outputs	2
GSM Antenna	External
Firmware OTA	GPRS
Dimension	90 x 65 x 27 mm
